

led profile

Our PROFESSIONAL led profile series for walls and hanging applications is manufactured in high purity aluminum, lacquered and textured in white or black. The power supply can be housed inside. This profile uses reflectors with 4 or 7 modules and 2 different types of optics of 65° or 90°, improving visual comfort and guaranteeing a low UGR.

It is suitable for rigid strips with a maximum width of 25mm, designed for the 4 and 7 module optical system. In addition, it has blind covers in white or black aluminum for the sections where lighting is not required. It has a removable tray, making maintenance easier. We recommend the fixing of a safety cable (22.039) from the base of the profile to the dissipating tray. Both the profile and the tray are available in lengths of 3.4 metres.

We offer a 5 year warranty on profiles.

GALES COMFORT

Aluminium profile

16.012	lacquered white	3.40m
16.013	lacquered black	3.40m

Aluminium tray

14.033	lacquered white	3.40m
14.034	lacquered black	3.40m

Blind section

18.112	white aluminium	3.40m
18.113	black aluminium	3.40m

Aluminium endcaps

19.247	white
19.248	black

Profile joints

22.219	steel
